Book Reviews & Authors

Let's Be Friends -

Next week first graders will discuss their neighborhood and will be asked, "What do friends do together?" In the informational text **Friends**, they'll read about friendship and make connections with their own experiences. Mr. Cole's class will also be taking a deep dive into non-fiction as they learn more about insects.

Insects -

The first-grade insect unit has provided opportunities to discuss life cycle. Observation of the Monarch Butterfly has been a great chance to watch complex metamorphosis, but there are a number of insects that go through a subtler change. Next week Mr. Cole's class will be taking a look at ~~Milkweed~~ ~~Bugs~~ Madagascar Hissing Cockroaches! Students will discuss habitat; provide food (vegetables), water, air, and space. The class will look at nymphs and observe the changes that occur as they mature. Molting, movement, mating, color patterns, and death are important in developing an understanding of life cycle. Some of the concepts in this unit include ...

nymph habitat adult head thorax abdomen
